## STOP Traffic Accident!

## Wear reflectors and brightly colored clothing!

To prevent traffic accidents at night, it is important for drivers to notice pedestrians on the road.

☆Wear "reflectors"!

Reflectors spark by car lights so that drivers can perceive pedestrians from a distance even at night.

There are various kinds of reflectors that can be attached on shoes, clothes, bags, etc.

☆Wear brightly colored clothing!

Bright colored clothing also makes it easier for drivers to see pedestrians.

White, yellow, or eye-catching colored clothing is highly recommended.

Wearing reflective materials and bright colored clothing will help drivers notice people more than twice as quickly as when you wear dark colored clothing.

As gift for participating, you can have the reflectors that you make with children in today's event. For your safety, please wear the original reflectors.
